

**SCOTLAND'S MOUNTAINS:  
KEY ISSUES FOR THE FUTURE**

**MARTIN F. PRICE, BENJAMIN J. DIXON, CHARLES R. WARREN, AND  
ANDREW R. MACPHERSON**

**Published by Scottish Natural Heritage, Battleby 2002  
ISSN 1350-3111**

**Table of Contents**

1. Introduction: mountains on the global agenda
  - The global context
  - Scotland's contributions to the International Year of Mountains
2. Defining Scotland's mountains and mountain areas
  - Altitude and agricultural potential
  - Combining criteria: altitude, slope and relief
  - Ecological/land cover criteria
  - Integrated approaches: Natural Heritage Futures
3. Sustainable mountain development issues in Scotland
  - The concept of sustainable mountain development
  - Proposals for sustainable mountain development in Scotland
  - Examples of integrated approaches in Scotland's mountain areas
  - Lessons learned
4. Defining the issues for future management
  - People: employment, services, and opportunities
  - Land ownership
  - Tourism and recreation
  - Agriculture
  - Forests and trees
  - Fieldsports: deer, grouse, and heather moorland
  - Nature and landscape conservation
  - Wild land
  - Renewable energy
  - Freshwater resources
  - Climate change
5. The future of Scotland's mountain areas:  
Perceptions of landowners, residents and recreational users
  - Recreational users
  - Landowners
  - Key opinions
  - Summary and conclusions
6. Looking forward

- Partnerships
- Data and information: decision-making and assessing progress
- Diversity and integration
